Amendments to the Specification:

Please replace paragraph 0020 with the following paragraph:

[0020] In yet another aspect, a system for encrypting content to a user is provided. The system comprises a user terminal, content receivable by the user terminal and a processor module configured to implement the method described above.

Please replace paragraph 0050 with the following paragraph:

[0050] The tuner module 44 tunes broadcasts received by the user terminal 13. Tuning refers to choosing a particular channel or specific content to be downloaded or received by the user terminal 13. The operation of the tuner module is described in greater detail in Figure 8 and the accompanying discussion.

Please replace paragraph 0052 with the following paragraph:

[0052] Figure 4 is a block diagram of an embodiment of the user terminal 13 showing steps for receiving, viewing, and recording content. The user terminal 13 includes a GUI 33. Analog content 93 is received and decoded at step 95. The analog content 93 is then viewed at step 97. Digital content 73 is also received by the user terminal 13. The user can input instruct the GUI to either view the digital content 73 at step 75, record the digital content 73 at step 77, "time shift" the digital content 73 at step 79, or playback the recorded digital content 73 at step 81. The user chooses the input options from a menu displayed by the GUI. The user chooses either step 75, 77, 79, or 81 by entering an option into the menu from a keyboard, touch sensitive screen, or mouse.
